

Dutch startup makes gossip functional with new app!

Press resume

Six Dutch friends will launch the app Who? Available September 1st in the AppStore and Google Play Store. You play Who? with your Facebook friends: 2 players must guess which (mutual) Facebook friend is their target. Who? is free! The App is available for iPhone, iPad (soon available) and Android (smartphone and tablet).

Details

Who? combines today's technology with the sentiment of the past! No bling bling or bright colors but a cardboard box on an old tablecloth.

Who? is free but there is also a premium version (Upgrade just € 1.79). This upgrade makes the user experience even more fun. With a premium account you can play the unique game "**Double Trouble**" where you have to guess two Facebook friends at once. No ads and you get 25 free hints.

Who? gave the most attention to the "look and feel" of the app. Similar to the game "Who Is It?" you tilt the board to set the pictures straight. A real tablecloth is used and in the inside of the box you can see the chips crumbs from 20 years ago. Because you can see the back of the board of your opponent the game is even more exciting. You can see realtime how far he or she already is.

Because Who? tests how good you know your friends, you don't want to lose! All the gossip that you know about your friends finally come in handy!
